---

## OBJECTIVE:

To associate with an organization that provides me an opportunity to use my interpersonal skills and to pursue a challenging career that will enhance my knowledge and skills by adopting a learning approach. I would like to build a successful career in your industry that offers professional growth.

## PROFESSIONAL SUMMARY:

- Having overall **6** months of experience in Analysis, Design, Development, Research and Implementation of Web Applications.
- Training Students Java Full Stack Which includes HTML CSS JS and react JS and on Backend Part Spring Boot and Spring Rest and test the Rest API in postman.
- Good experience in developing applications using JAVA/J2EE technologies like Java, **JDBC, Servlets, JSP, Spring IOC, Spring AOP, Spring MVC, Spring Boot, Spring Data, Spring ORM, Hibernate with JPA, Restful Services, Design Patterns, MVC and Micro Services.**
- Also has the experience of training in Core Python Core Java and Frontend Technologies
- Experience in developing front-end User Interfaces using **JSP, HTML, CSS, Bootstrap, JavaScript, React JS.**
- Made use of OOPS characteristics like Abstraction, Encapsulation, Inheritance and Polymorphism for best practice coding.
- Experience in Database Design and Database Programming in MySQL and MongoDB.
- Excellent analytical and programming abilities in using technology to create flexible and maintainable solutions for complex development problems.
- Having experience in providing in-house trainings.
- Excellent team player and ability to adapt to changes quickly and efficiently.
- Excellent analytical and programming abilities in using technology to create flexible and maintainable solutions for complex development problems.

## Technical Specialization

Core Java  
J2EE  
Spring Boot  
Spring JPA  
Core Python  
Rest API  
Micro Services Architecture  
Postman  
GitHub

Database:

MySQL  
MongoDB

Frontend:

HTML  
CSS  
Bootstrap  
JavaScript  
React Js  
Redux

## **EXPERIENCE SUMMARY:**

Working as Software Technical Trainer in Pentagon Space Pvt Ltd, Bangalore from Dec-2023 to till date.

## **TECHNICAL SKILLS:**

**Java Technologies:** Java, JDBC, Servlets, JSP.

**Distributed Technologies:** Restful services.

**Frameworks:** Spring and Spring Boot and Micro services,

Express JS. **UI Technologies:** HTML, CSS, Bootstrap, JavaScript, React Js, Redux.

**Database:** MySQL, MongoDB.

**Web/App server:** Tomcat.

**IDE:** NetBeans, Eclipse, STS.

**Operating System:** Windows.

**Tools:** Maven, GIT.

## **EDUCATIONAL QUALIFICATION:**

BE in ISE from Vaidya Vikas Institute of Engineering and Technology, Mysore VTU-Karnataka

## **PROJECT DETAILS:**

### **Project 1: ProductManagement**

**Duration:** November 2023 to

January 2023

**Technologies and Tools:** Spring Boot, React JS, react-router, Bootstrap, Git, MySQL.

**Team-Size:** 1 (Alone)

### **Description:**

Designed and implemented a robust Project Product Management System utilizing React.js with React Router for dynamic frontend development, complemented by Bootstrap for responsive design. Backend services were developed using Spring Boot, interfacing with a MySQL database for efficient data management. Ensured API reliability and performance through comprehensive testing using Postman.

### **Responsibilities**

- Involved in gathering the requirements, analysis, design & development of the project.
- Developed webforms using React JS, Html, CSS, Bootstrap, Spring Boot, MySQL, Rest API.
- Developed classes using MVC patterns.
- Design and developed database schema.
- Responsible for bug fixes.
- Responsible for API testing using Postman.
- Developed Test cases

## **Project 2: Weather Application**

**Duration:** Jan-2024 to feb-2024

**Technologies and Tools:** React JS, axios.

**Team-Size:** 1

### **Description:**

Developed a Weather Application using React, enhanced with Axios for API calls. Integrated the Tumarrow.io API to fetch weather data based on user-input locations. Implemented a feature to automatically detect and display weather for the user's current location, providing real-time weather updates with precision and user-friendly interface.

### **Role in Project:**

- Involved in Planning, Design and development of the application.
- Involved in implementing database design and structure.
- Responsible for developing Web forms.
- Responsible for bug fixes.
- Responsible for API testing using Postman.
- Developed Test cases

## **Project 3: Job Portal**

**Duration:** May - 2024

**Technologies:** React Js and Axios

**Team-Size:** 1

### **Description:**

Developed a Job Portal using React Js With the help of Hacker News API to fetch the Job Posts Initially it will render 6 jobs at a time and have a button called load more which will again load 6 more jobs each time clicks on load more button and has a link to move to official job portal web page along with the date of posting.

### **Role in Project:**

- Involved in Planning, Design and development of the application.
- Involved in implementing database design and structure.
- Responsible for bug fixes.
- Developed Test cases.
- Responsible for bug fixes.
- Responsible for API testing using Postman.
- Developed Test cases

I hereby declare that all of the details furnished above are true on the best of my knowledge and belief.
